

EXECUTIVE SUMMARY

The problem

- Venues are requested to charge phones approximately 8 times per day due to the difficulty of phones lasting the entire day.

The solution

- PowerRabbit is developing a phone charging network with a global reach.

Main aspects

- 3 operating countries
- ROI per station – 4 months
- Average time per session – 82 min

The opportunity

- Powerbank sharing gained popularity in China in 2017, while its development has only recently started to take shape in the western world.

How it works

- Scan the QR code
- Take the powerbank
- Charge anywhere
- Return the powerbank

Goal

- We are currently seeking partners to join us in the launch of PowerRabbit worldwide.

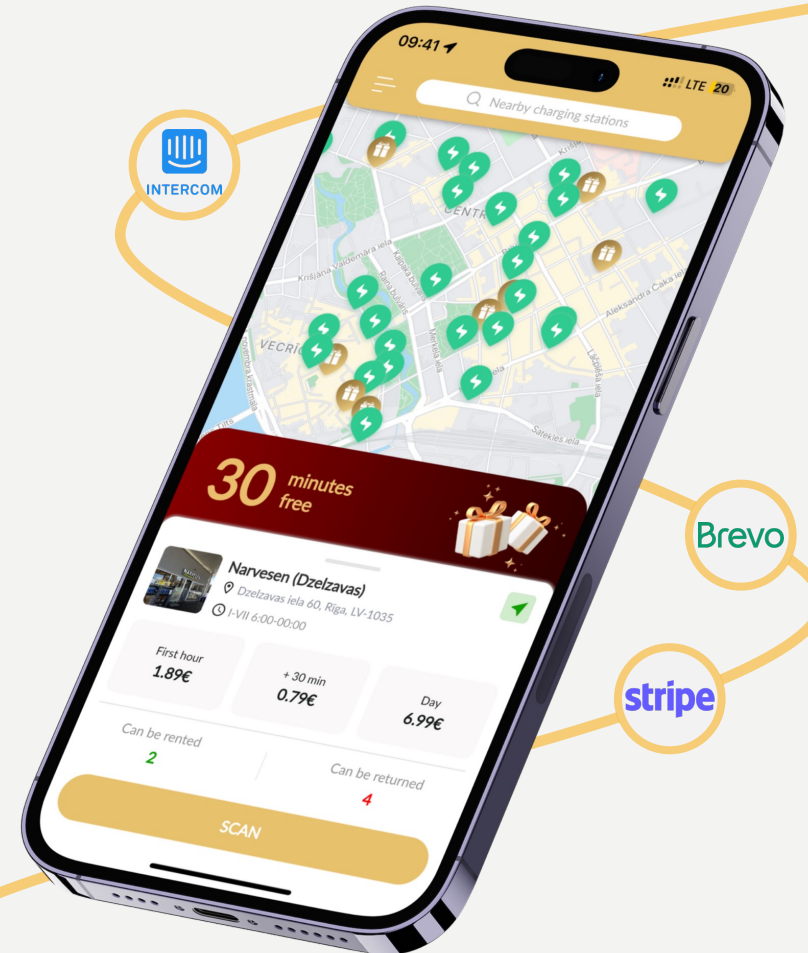

COOPERATION MODEL

What does PowerRabbit provide?

-  Hardware development
-  Software development
-  Tech support
-  Customer support

All you do is

 Business development

As a partner, your share is 88% of the rental revenue

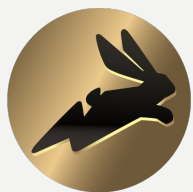

You

88%

PowerRabbit

12%
